EDUCATION

Columbia University Mailman School of Public Health | *Sept. 2026 – Present*
Expected Degree Completion: Aug. 2027; Expected Graduation: Oct. 2027
Degree: MS in Environmental Health Data Science

University of Edinburgh | Degree Completion: Jan. 2026; Expected Graduation: Jul. 2026
Degree: MSc in Medical Anthropology
Dissertation: *Conflicting Contagions: (Re)Emerging Geographies of Risk and Blame at the Confluence of COVID-19 and Dengue Fever Outbreaks in Jamaica, 2020 (Advisor: Lioba Hirsch, PhD)*

Brown University | Graduated: May 2023
Degree: Sc.B. Applied Mathematics-Biology (Track: Biotechnology and Physiology)
Degree: A.B. Anthropology (Track: Biological Anthropology)

WORK AND RESEARCH EXPERIENCE

Spatial Epidemiology Lab
Role: Research Assistant
Setting: NYC, NY, USA | Oct. 2026 – Present
Principal Investigator: Dr. Dustin Duncan, Dept. of Epidemiology, Columbia University Mailman School of Public Health

- Supporting the development and implementation of TUJUANE, a pilot initiative exploring social capital as a mechanism for strengthening HIV prevention and care among sexual minority men in Nairobi, Kenya.
- Facilitate participant recruitment for The Black Professors Study, examining how workplace conditions and experiences shape academic productivity, sleep, and mental health among faculty of color.

Social Equity Action Lab (SEAL)
Role: Research Fellow
Setting: Remote | Jan. 2026 – Present

- Conducting research to address systemic healthcare problems through legislation and policy making across themes of social equity, climate and health, care delivery, digital health, mental health, caregiver policy, and out-of-hospital care for publication
    - Currently supporting research project focused on home-based care and healthcare delivery

Boston Public Health Commission (BPHC)
Role: Health and Racial Equity in Wastewater Epidemiology Researcher *(Epidemiology focus)*
Setting: Boston, MA, USA | Jul. 2023 – Jun. 2024

- Supporting the implementation of BPHC's neighborhood-level infectious disease wastewater monitoring program in the city of Boston
- Conducting research on syndromic surveillance strategies, COVID-19 lineages/variants, seasonal respiratory illness surveillance data sources (4C, MAVEN, NSSP), fetal infant mortality review (FIMR) legislation, overdose data to action (OD2A) and ICD-10 codes to advance public health strategy
- Coordinating biomarker/genomic monitoring literature reviews and research in wastewater settings to detect for infectious disease (COVID-19, RSV, Influenza) and substance use indicators
- Data management, cleaning, visualization, biostatistical analysis and spatial analysis training in R and GIS to develop biweekly wastewater surveillance data reports for public health outreach
- Co-authoring publications, manuscripts, grant and IRB proposals, public health messaging/protocols and conference materials focusing on neighborhood-level infectious disease wastewater monitoring
- Developing dashboards and training materials for R-based wastewater report generation and disease mapping
- Overseeing interviews, meetings, administration and internal/external collaborations relevant to Boston's wastewater monitoring system, sewer construction, and FIMRs

Role: Health and Racial Equity in Wastewater Epidemiology Researcher *((Bio)medical Anthropology focus)*
Setting: Boston, MA, USA | Feb. 2023 – Jun. 2023

- Leading monthly seminar presentations related to my independent ELSI research on the sociocultural and environmental development of Boston population/public health, neighborhoods and sewer systems
- Overseeing technical documentation, interviews, meetings, administration and internal/external collaborations relevant to Boston's wastewater monitoring system and sewer construction
- Creating biweekly wastewater surveillance data reports for public health outreach

Brown University
Role: Undergraduate Teaching Assistant
Setting: Providence, RI, USA | Sept. – Dec. 2022
Class: UNIV 0450: We Live In Interesting Times – The Long Reach of the COVID-19 Pandemic

- Planning the curriculum (topical student assessments and activities) with professors for new interdisciplinary public health course on the long reach of the COVID-19 pandemic
- Leading weekly discussion sections and managing student queries on the long-reach of the COVID-19 pandemic

SKILLS

Technical Skills: Proficient in Computer Programming (Java, JavaFX, MATLAB, QGIS, R, RStudio); MySQL; Tableau; Microsoft Office Suite; Google Workspace; Slack; Qualitative and quantitative research (data collection, analysis and writing)
Professional Skills: Adaptable; Collaborative; Critical Thinking and Analysis; Detail-oriented; Empathetic; Inquisitive; Interpersonal and Oral Communication; Creative; Leadership; Open-minded; Problem-solver; Quick-thinking; Resilient under pressure; Time Management
Languages: English (fluent), Jamaican Patois (fluent), Spanish (proficient)

Madeline Sharp

LEADERSHIP AND VOLUNTEERING EXPERIENCE

Edinburgh Centre for Medical Anthropology (EdCMA) Student-Led Conference for Spring 2025
Role: EdCMA Conference Planning Committee Co-chair
Setting: Edinburgh, Scotland, UK | Jan. 2025 – May 2025

- Peer reviewing, approving and rejecting conference presentation abstracts
- Managing conference structure, finances and technical logistics
- Assembling conference session chairs
- Creating conference attendance and feedback forms

Brown University Swearer Center for Public Service
Role: Student Advisory Committee (SAC) Member; Diversity & Inclusion Accountability Subcommittee Chair
Setting: Providence, RI, USA | Aug. 2020 – Dec. 2021

- Advancing healthful social innovation, civic engagement, community-engaged research and engaged scholarship via ethical student leadership, social justice, academic rigor, reciprocity, respect, diversity, equity and inclusion
- Representing the Brown student community and their concerns in the Center's decision-making, financial and strategic processes
- Advising the Center director and staff on all aspects of the Swearer Center, including issues of diversity and inclusion accountability
- Managing projects, people and finances related to moving Brown University's Diversity and Inclusion Action Plan (DIAP) into Phase II

PRESENTATIONS/CONFERENCES

Wastewater Epidemiology as a Public Health Tool in Boston Beyond COVID-19
Setting: Boston, MA, USA | Apr. 2024
Presenter: Justin Hart, Boston Public Health Commission
Co-Author(s): Tahir Arif, Boston Public Health Commission, Sreedevi Ravi, Boston Public Health Commission, **Madeline T. Sharp**, Boston Public Health Commission, Kathryn T. Hall, Boston Public Health Commission, Brigham and Women's Hospital and Harvard Medical School, Bisola O. Ojikutu, Boston Public Health Commission, Division of Infectious Diseases, Massachusetts General Hospital, Brigham and Women's Hospital and Harvard Medical School, Tori L. Cowger, Boston Public Health Commission, François–Xavier Bagnoud Center for Health and Human Rights, Harvard T.H. Chan School of Public Health
Presented at the Boston Area Research Initiative (BARI) Conference

The Sociocultural and Environmental History of Boston and its Sewer System (BPHC)
Setting: Boston, MA, USA | May 2023
Virtually presented to the Harvard T.H. Chan School of Public Health's *The Public Health Disparities Geocoding Project* team
